Hiring Team
Flexalighting North America
15531 24th Avenue, Surrey, BC

Dear Flexalighting hiring team,

I am applying for the Graphic Designer & Social Media Specialist role. I am a designer in Surrey, and most of my work is a brand I have built and then carried onto everything it has to live on: guidelines, printed pieces, a website, social posts and video. Your posting describes that same job pointed at architectural lighting, and that is work I would like to do every day.

For Feeds, an open-source product built by a developer client, I designed the identity and an eleven-page guidelines document covering logo usage, a palette with usage ratios, a five-step type scale and a family of fifteen icons. And so when the launch came, the same system went onto printed table runners, die-cut stickers in four colourways, two looping booth reels, the marketing site and the product's email digest. For Surface Fixer, my family's surface-repair business, I designed the wordmark and business cards and sent the print files to the printer myself.

You asked for social examples and my part in each, so here they are plainly. I built SyriaTek, an Arabic-language technology series on Instagram and Facebook. I designed the bilingual identity, presented both pilots on camera, cut them, wrote and corrected the Arabic and English captions, published them and tracked the results. My sister filmed the street footage in Syria for me, and I used ChatGPT for first drafts of scripts and captions that I then rewrote. In fifteen days the two videos reached 1,556 unique viewers, about 92% of them people who did not follow the account. Yet I set a goal of 100 followers and reached 21, which taught me that introductions find an audience and only a steady calendar keeps one. I also led my team's Instagram account in a BCIT marketing course competition, gaining 80 followers in a day and a half, and managed the website and social pages for the South African Cultural Association of BC. My page at rawanaladdin.com/flexalighting breaks each one down by design, copywriting, planning and account management.

At the University of Toronto Muslim Students' Association I was the event photographer and the only editor for a full year, so shooting a finished project and editing it to a consistent standard is familiar ground. I also have a real interest in architecture. My printed publication on the mosaics of the Hagia Sophia, laid out in InDesign for a BCIT assignment, is the work I return to when I think about designing for buildings.

I live in Surrey and can start on site. Thank you for your time and consideration.

Sincerely,
Rawan Aladdin

RAWAN ALADDIN

Designer — brand systems, print and digital layouts, and social content

Surrey, BC • 778-239-8020 • hello@rawanaladdin.com • rawanaladdin.com/flexalighting • linkedin.com/in/rawan-aladdin

SUMMARY

Designer across brand identity, print and digital layouts, and social content. I make the identity and everything that carries it: guidelines, printed pieces, a website, posts and short-form video, kept consistent from one to the next. Bachelor of Creative Industries, BCIT.

EXPERIENCE

Freelance Designer, *Freelance, Vancouver* **Feb 2026 — Present**

- **Feeds**, open-source news reader for a developer client. Designed the brand identity and an 11-page guidelines document: logo usage and misuse, a palette with usage ratios, a five-step type scale and a 15-icon family. The engine is the developer's; everything you can see is mine.
- Carried the system into the product interface, the digest email, the marketing site and a launch booth: printed table runners, die-cut stickers in four colourways, and two looping reels.
- **Surface Fixer**, family surface-repair business, 2026 — present. Wordmark and pattern system; business cards prepared as print files and sent to the printer myself; website redesign; invoice and document templates in Google Docs and Sheets.

Creator and Designer, SyriaTek, *Instagram and Facebook* **Jun — Aug 2026**

- Arabic-language short-form technology series; began as a BCIT term project and published as a public pilot. Bilingual Arabic/Latin identity, animated wordmark and a reusable production guide.
- Presented, cut and captioned two 1080×1920 pilots in CapCut with Arabic and English subtitles, then published and tracked them: 3,823 views and 1,556 unique viewers in 15 days, about 92% from non-followers. Missed my 100-follower goal at 21 and reported why.

UX/UI Designer (Internship), *RainbowVI Educational Association* **Apr — May 2025**

- BCIT diploma placement. Redesigned an MVP web app from interviews, surveys and competitor analysis; personas, journey maps and Figma prototypes handed to developers.

Graphic Web Designer & Project Manager (Internship), *South African Cultural Association of BC* **Jul — Sep 2023**

- Managed a team of six that redesigned the association's website and social pages; designed web and social graphics as one visual system and coordinated the social campaign for an upcoming event.

Digital Media Director, *Muslim Students' Association, University of Toronto* **Jul 2022 — May 2023**

- Event photographer and sole editor for a year of marketing and outreach, all post-production in Adobe Creative Cloud; directed 2—4 volunteer shooters.
- Wrote the year's media plan and budget of about $1,000, tracked it quarterly and spent under $200.

EDUCATION

Bachelor of Creative Industries, *British Columbia Institute of Technology* **2026**

Diploma, Digital Design and Development, With Distinction, *British Columbia Institute of Technology* **2025**

Coursework, Cognitive Science and Digital Humanities, *University of Toronto* **2021 — 2023**
